

Description of the project/program and the amount request

This proposal is for the acquisition of an IPEVO (Low Cost – Smart Board Tech on a Budget) gives the feature of a Smart Board technology but not the high cost of the equipment. To use in hand with the new acquisition of the Spanish Textbook – “Qué Chévere” that has a lot of interactive tools in its online platform Carnegie Learning!

The amount I request for this project/program is \$350.00

Why the project/program is important and who will benefit

This device IPEVO with his whiteboard feature support the teaching process of the World Language Program (Spanish) in four ways: it interaction and conversation in the classroom; the presentation of the cultural and linguistic elements; promotes the learning process of the multiple intelligences (Linguistic, Logical-mathematical, Spatial, Musical, Intrapersonal, Interpersonal, naturalistic, bodily-kinesthetic Howard Gardner's theory of multiple intelligences 1983 book “Frames of Mind”); and it promotes the organizational skills of the teacher and students (John Dewey 1894 theory that emphasize the need to learn by doing that human beings learn through a ‘hand-on’ approach).

With the acquisition of this device (IPEVO) improve the time on the learning process of the new language of the student and facilitate the conversation with the students in the target language (Spanish). This device going to improve that all members of the classroom may concentrate on the same item at the same time and enhances conversation.

The feature that IPEVO offer save me time to navigating from point to point, I would be able to face and interacts with the class focusing more on the student’s language production instead of technical issues. Help me to reinforce the vocabulary or organize new concepts by overwrite, underlining, highlighting or circling the elements that are important to emphasize and allow students to focus and they are not lost and they know what the teacher wants them to do in class. That document used in the teaching process can be saved for the class to use the next day or as reference for previous lessons at any time or printed for students that been absent to the class that day.

List of costs associated with the project/program

The investment is based on pricing obtained from the cost of the product website and a small add was made to accommodate for potential increase in cost, tax, shipping and handling from the time of submission to the time of approval and purchase.

- IW2 Wireless Interactive Whiteboard System (Model Number: 5-876-1-01-00 include three devices: The Interactive Pen, the Sensor Cam, and the Wireless Receiver) price around \$169.00
- Adjustable movable laptop desk price around \$150.00 (plus tax, shipping and handling)
- Completion date of project around a week
- Total proposed investment \$350.00
